[Save](#)

1. Access the WooCommerce and Shopify Automation section in Spacetree.
2. Click on the `Create` button.
3. Fill out the form for the automation campaign:
4. Provide a name for the campaign.
5. Select the store type. (e.g. Shopify)
6. Choose the Store API from the dropdown list.
7. Select the action as `Order notification`.
8. Adjust the message delay if needed (default is 0).
9. Choose the message template you've created.
10. In the variable, `system delivery after days`, input the number of days your store will take for delivery.
11. Assign labels and sequences for the user as needed by selecting from the drop-down list.
12. Finally, save the campaign.

Note: If you didn't integrate Shopify or Woo-Commerce then you can integrate them from Add `New API`.

### **Integrating Add New API**

1. Access `Add New API`.
2. A new page `E-commerce Profile` will open.
3. Select Woo-Commerce or Shopify.
4. Now fill `profile Name`, `Store Sub-domain`, `Admin Access Token`.
5. Click Save.

### **Test the Campaign**

To confirm that the setup works as intended, create a test order on your Shopify store.

Spacetree should automatically send an order notification to the user's WhatsApp account.

By following these steps, you'll be able to successfully set up and send Shopify order notifications to WhatsApp using Spacetree.
